Timeless luxury yachts

Genuinely Italian in its management, designers and artisanal skills,
Monte Carlo Yachts aims to break new ground in the luxury motor yachts segment.
The Italian shipyard is dedicated to crafting timeless luxury yachts that have been internationally
recognized both for their iconic style and performance.

In value we trust

The value of time, style and elegance. The value of space, responsibility and well-being. The value of the individual. These are values that represent Monte Carlo Yachts' core vision, a special way of interpreting the world, sailing, luxury and our relationship with the ocean.

Harmony

We believe that the most beautiful things possess harmonious balance between form and function, performance and aesthetics.

Harmony is at the centre of everything we do, and the whole must always be greater than the sum of its parts.

People first

We create unique yachts and experiences, and we build around the needs and desires of our customers. MCY offers a personal relationship that makes people feel good.

At Monte Carlo Yachts we are as passionate and motivated as our clients.

Pioneering attitude

Doing things differently is not always easy but it is necessary; the best ideas come from exploiting new opportunities driven by a clear vision. At Monte Carlo Yachts we approach tasks with a pioneering attitude that, when applied with pragmatism, precision and creative flair, can overcome any perceived limit to take us beyond the expected.

Reliability

At Monte Carlo Yachts we are totally committed to you. It's not just something we say, it's something we do every day. Open, human interaction can make all the difference, and you can count on us to be honest, reliable and more than willing to go the extra mile.

The fleet

Elegant yachts with a distinctive style combined with harmonious lines and enriched by sophisticated materials and contemporary decorative touches: the MCY Collection stands out for its unique features.

The level of maturity achieved by Monte Carlo Yachts is clearly expressed through wide internal spaces, impressive panoramic views, engineering solutions that have reached new levels of achievement, and design ideas that have been tailored to offer owners well-being and comfort.

Classic distinction

The MCY yachts are thought, designed and built to stand the test of time and go beyond trends and fads that come and go. We recognize that new standards of luxury are constantly being established and that responsibility, sustainability and personality are increasingly important. We rise to the challenge of building each and every one of our motor yachts to be the best expression of luxury today and tomorrow. Our yachts are elegant but never overstated, innovative but noble: they are timeless classics.

Discover MCY's
revolutionary naval
architecture and unique
production process

Leading technology

At Monte Carlo Yachts we understand that there is no form without function, and no function without form. For a yacht to be beautiful, it also needs to come from technological excellence. Inspired by Lean Manufacturing concepts derived from the most advanced industrial sectors, Monte Carlo Yachts manufacturing process constitutes an extraordinarily innovative approach in the yachting sector. We pursue aesthetic quality and unmatched technical reliability whilst achieving high levels of productive efficiency.

This revolutionary approach has received an Industrial Design Association award in recognition of our research in technology and construction.

Innovation in a
Production Process

Naval Architecture and Production Process

Monte Carlo Yachts has gone above and beyond its truly iconic design and remarkable customization capabilities by introducing revolutionary naval architecture and a unique construction process.

MCY yachts are made of three modules – hull, interior module and deck – which are built simultaneously until the last detailing stage then joined together during final assembly.

The truly innovative element is represented by the interior module, which is built in its entirety as a single piece outside of the hull. In addition the traditional hull structure is replaced by an innovative internal structural skeleton so that the entire beam of the yacht contributes to increase the structural qualities.

GRP components and infusion process

All fiberglass components of every MCY yacht are meticulously manufactured using engineered core materials and resin applied by vacuum infusion. This choice provides a better work environment thanks to a drastic reduction in the levels of air emissions, whilst also reducing the yacht's weight through the optimization of the impregnation ratios of the composite.

Almost unique in the sector, all fiberglass major components used receive a special post-curing treatment before going to the assembly line, guaranteeing the best mechanical and physical properties further to elimination of residual emissions. This procedure is performed inside the company's state-of-the-art painting facility, which works also as a high temperature oven.

Bespoke attention

Every one of our models is unique, and it couldn't be any different, because it is built around the dreams of its owner. We design and build MCY yachts through a close collaboration with the owner creating an exclusive experience and relationship that lasts in the long-run.

At Monte Carlo Yachts, we deliver truly unique yachts born from bespoke personal experience and attention to the smallest details.

Tailored yachts

What may come to a surprise at first is discovering that Monte Carlo Yachts builds fiberglass yachts where virtually every inch of space is custom-designed and hand-made. Customization options range from the main deck, lower deck and exterior areas, all aiming to offer exceptional enjoyment and liveability. Leveraging technology both within the design and manufacturing process, the MCY Collection offers limitless possibilities to satisfy any owner's special requirements.

All materials used in the yachts' living spaces come from the world's top design firms and the best Italian suppliers. The aim is to combine selected natural stones and woods, hand-made tiles, decorative metals, high end fabrics and hand-stitched leathers in a balanced and refined way

MCY 76

Beyond boundaries

The MCY 76 distinguishes itself in the MCY Collection for the many comfortable and versatile spaces distributed in the large volume of the yacht.

The design of the model is focused on further expanding the liveable spaces whilst at the same time making it brighter, with a direct and more evocative relationship with the outside world and the ocean.

The new solutions introduced enhance the feeling of comfort in all the different areas and provide unique experiences for a yacht of this category.

Come onboard
and explore
the MCY 76

A proper lounge area where guests may relax on the large sunpads and enjoy special moments with friends and family on the comfortable dining tables, both when moored and when safely cruising across the sea

Thanks to the carbon fiber T-Top and stainless steel lateral supports, the spacious flybridge offers a 360 degrees open view of the sea

Being a single flat surface with almost no structural limits, this external area can be fully customizable to the owner's taste and preference. With a spacious open-air galley as well as sofas and large tables, this is the perfect location for an onboard private and elegant dining experience

Enjoy the breeze and embrace the sense of freedom while safely walking from the bow area to the aft cockpit through wide and well-protected sideways

Focusing on reinforcing the individual's relationship with the outdoors, the large alfresco dining location of the Aft Cockpit connected with the main saloon offers an additional relaxing area

Enjoy the moment:
Monte Carlo Yachts distinguishable mirrored fashion plates increase the level of protection from environmental factors and ensure even greater privacy

Turn dreams into reality by customizing the layout of the main deck to your own needs and desires with multiple comfortable living situations available for the main saloon

Unique interior design features enrich the elegant and sophisticated atmosphere of the main saloon. The presence of natural light in this open space is enhanced by the use of wide windows and the choice of reflective high quality materials

The presence of natural light in the lower deck enhances the brightness of the interiors. This pleasant atmosphere is characterized by the functional and streamlined distribution of the cabins

An ensuite bathroom and a proper dressing room complete the owner's cabin layout focusing on a harmonious decor palette of high-end materials for a pleasantly refined atmosphere

Vast surfaces and generous volumes are distinguishing features of the versatile and customizable cabins, which present high-end materials as well as innovative entertainment equipment

The other two guest cabins and the VIP suite follow the sophisticated decor of the other interior onboard spaces and feature bespoke custom layout configurations

The introduction of natural stones used for sinks, floors and vertical surfaces combined with the presence of wide mirrors enhance the enlarged volumes of the all the bathrooms onboard

MCY 76 details

Timeless elegance is the driving force behind the design of all the internal and external areas. The combination of colours, the juxtaposition of elegant high-end materials, and the reflective effects of the different surfaces creates a harmonious atmosphere

The crew quarters are easily reachable both through the engine room and the lateral access on the sideway. Amongst the unlimited customization options offered on this yacht, can transform one of the crew cabins in a galley and dinette area

MCY 76

Volumes to experience

The multitude of exterior and interior living areas onboard show the clear vision and willingness to create a unique yacht that is fully customizable in all its parts.

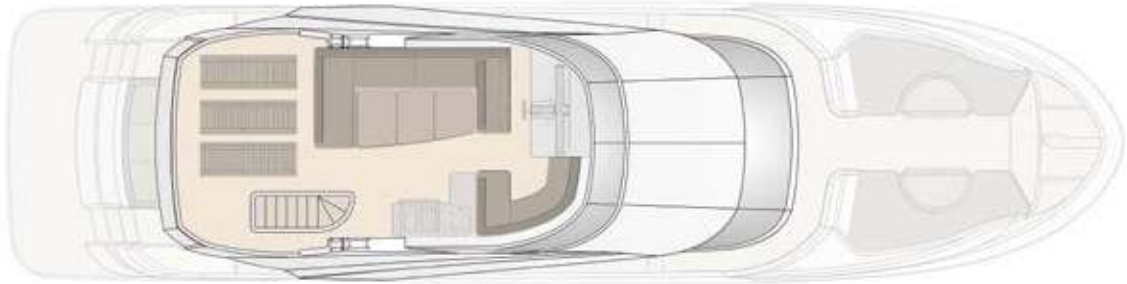

The studied layouts and the equipment available can transform the MCY 76 in the yacht of the owner's dreams, thanks to the impressive technical achievements and the best-in-class interior volumes and exterior surfaces available.
